

## Transient vs Non Transient Incident Report

The daily average number of Transient and Non Transient incidents are as follows –

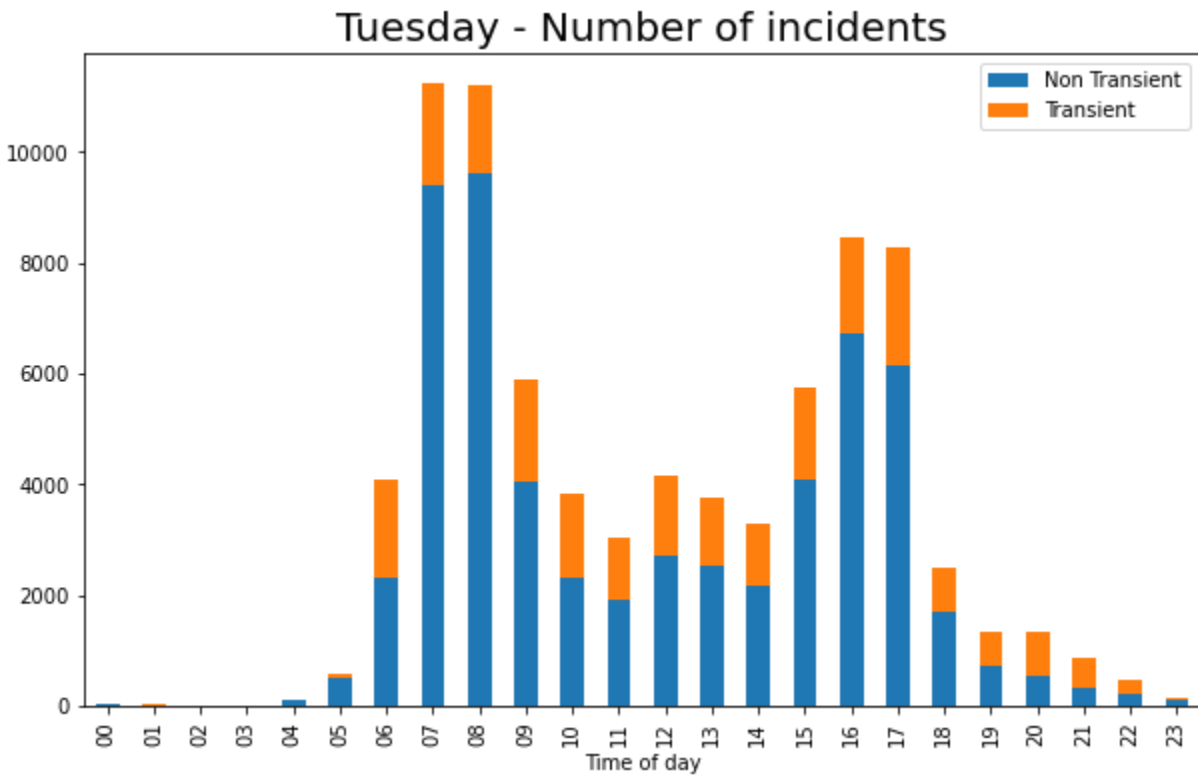

It can be seen that the average Non Transients are more everyday, except for the weekends. On Saturdays, the transient incidents were more than the Non-Transients.

By further looking into hourly trends on each day of the week, the following data was found:

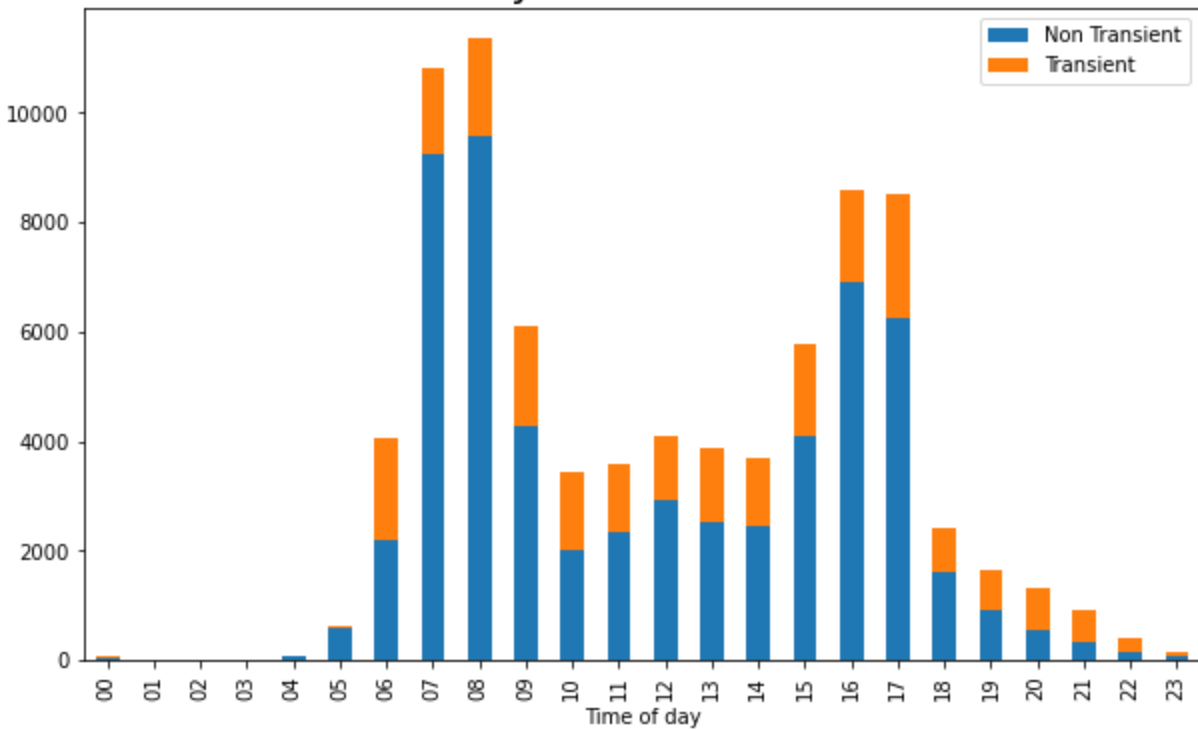

On Mondays, there are more non transient incidents than Transient after 8PM

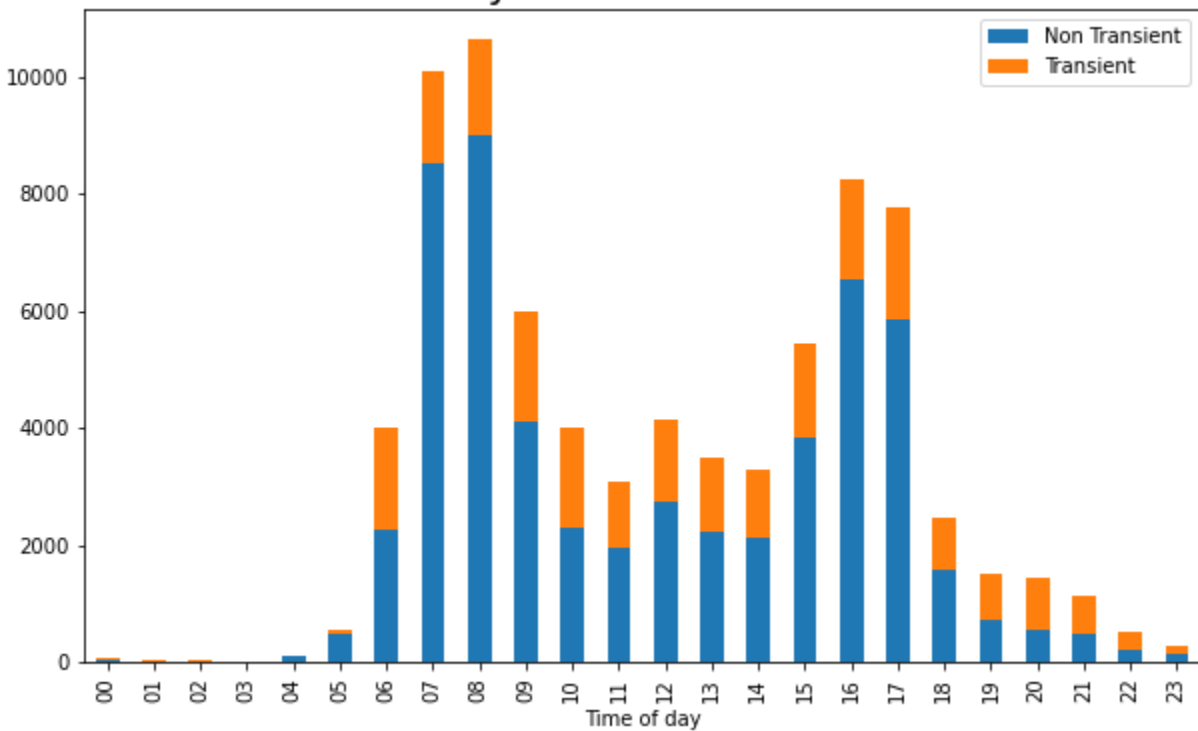

The same goes for Tuesday and Wednesday as well

Wednesday - Number of incidents

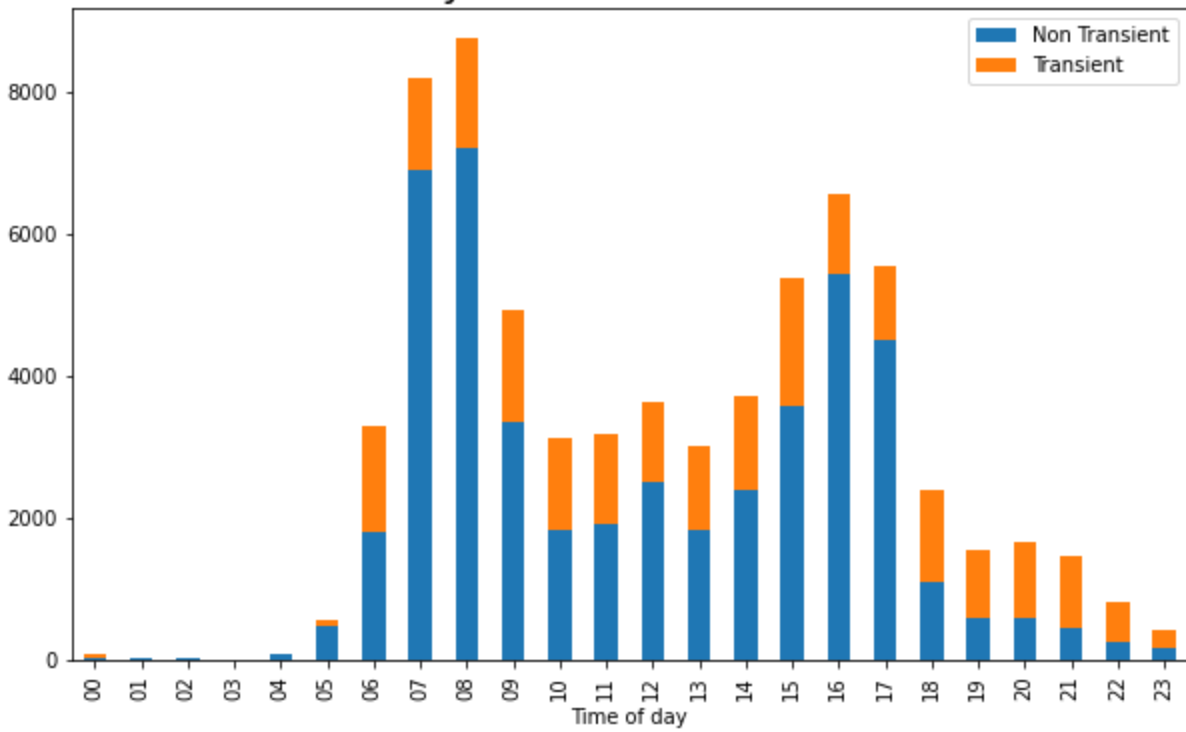

Starting Thursday, the number of transient entries rise even earlier, by 7PM

Thursday - Number of incidents

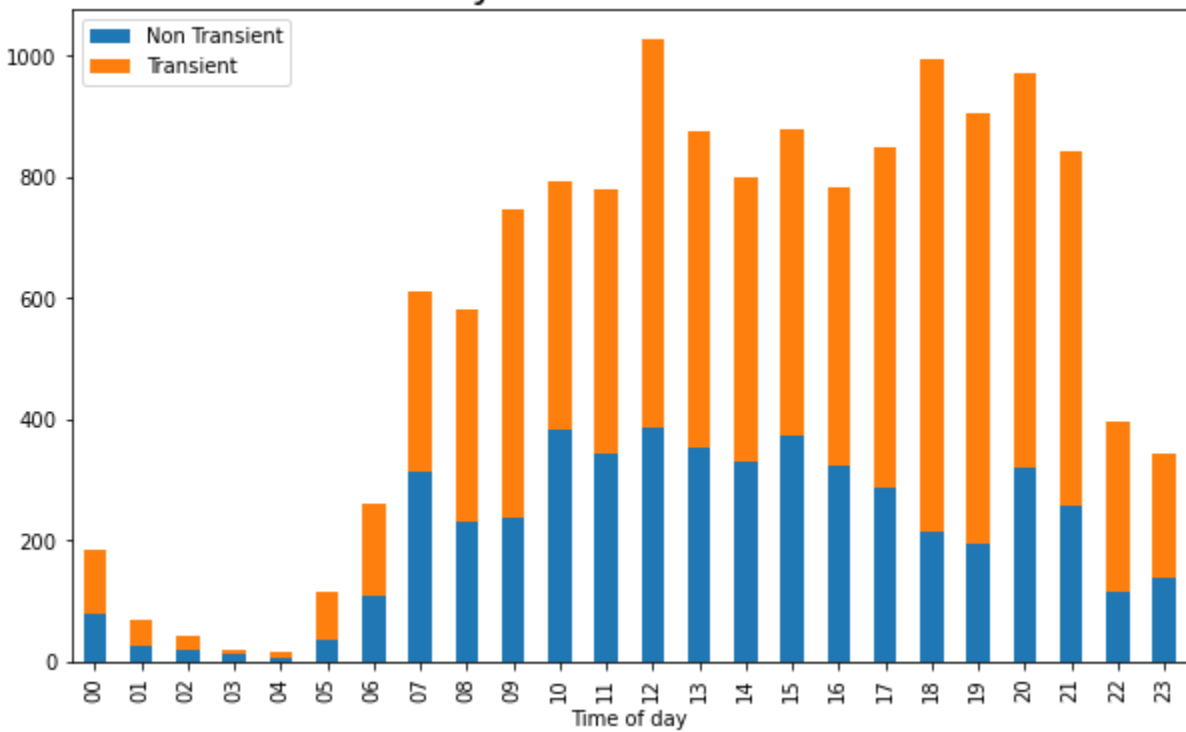

On Friday, it's even earlier, that is, 6PM

### Friday - Number of incidents

On the weekends, Transient incidents start rising early in the day, and go on for the entire day.

### Saturday - Number of incidents

Sunday - Number of incidents
